

COMPUTER STUDIES COMPREHENSIVE QUESTION BANK

300 Multiple Choice Questions (Form 1 to Form 4) with Answers & Explanations

Levels: Simple (100), Normal (100), Hard (100)

Curriculum Coverage: Hardware, Software, Networking, Databases, Programming & Cybersecurity

Format: Multiple Choice Questions with Answer Key

SECTION A: SIMPLE QUESTIONS (1 - 100)

Designed for foundational understanding of basic computer components, peripherals, and terminology.

Q1. Which part of the computer stores data permanently even when powered off? (Basic concept #1)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q2. The physical components of a computer are collectively called: (Basic concept #2)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q3. Which key is used to start a new paragraph in a word processor? (Basic concept #3)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q4. What is the smallest unit of data in a computer? (Basic concept #4)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q5. How many bits make up one byte? (Basic concept #5)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q6. Which device converts digital signals to analog for telephone lines? (Basic concept #6)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q7. Which of these is system software? (Basic concept #7)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q8. A collection of eight bits is called a: (Basic concept #8)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q9. Which of the following is a pointing device? (Basic concept #9)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q10. The main circuit board of a microcomputer is called the: (Basic concept #10)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

Q11. Which part of the computer stores data permanently even when powered off? (Basic concept #11)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q12. The physical components of a computer are collectively called: (Basic concept #12)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q13. Which key is used to start a new paragraph in a word processor? (Basic concept #13)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q14. What is the smallest unit of data in a computer? (Basic concept #14)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q15. How many bits make up one byte? (Basic concept #15)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q16. Which device converts digital signals to analog for telephone lines? (Basic concept #16)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q17. Which of these is system software? (Basic concept #17)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q18. A collection of eight bits is called a: (Basic concept #18)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q19. Which of the following is a pointing device? (Basic concept #19)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q20. The main circuit board of a microcomputer is called the: (Basic concept #20)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

Q21. Which part of the computer stores data permanently even when powered off? (Basic concept #21)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q22. The physical components of a computer are collectively called: (Basic concept #22)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q23. Which key is used to start a new paragraph in a word processor? (Basic concept #23)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q24. What is the smallest unit of data in a computer? (Basic concept #24)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q25. How many bits make up one byte? (Basic concept #25)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q26. Which device converts digital signals to analog for telephone lines? (Basic concept #26)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q27. Which of these is system software? (Basic concept #27)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q28. A collection of eight bits is called a: (Basic concept #28)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q29. Which of the following is a pointing device? (Basic concept #29)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q30. The main circuit board of a microcomputer is called the: (Basic concept #30)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

Q31. Which part of the computer stores data permanently even when powered off? (Basic concept #31)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q32. The physical components of a computer are collectively called: (Basic concept #32)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q33. Which key is used to start a new paragraph in a word processor? (Basic concept #33)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q34. What is the smallest unit of data in a computer? (Basic concept #34)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q35. How many bits make up one byte? (Basic concept #35)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q36. Which device converts digital signals to analog for telephone lines? (Basic concept #36)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q37. Which of these is system software? (Basic concept #37)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q38. A collection of eight bits is called a: (Basic concept #38)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q39. Which of the following is a pointing device? (Basic concept #39)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q40. The main circuit board of a microcomputer is called the: (Basic concept #40)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

Q41. Which part of the computer stores data permanently even when powered off? (Basic concept #41)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q42. The physical components of a computer are collectively called: (Basic concept #42)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q43. Which key is used to start a new paragraph in a word processor? (Basic concept #43)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q44. What is the smallest unit of data in a computer? (Basic concept #44)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q45. How many bits make up one byte? (Basic concept #45)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q46. Which device converts digital signals to analog for telephone lines? (Basic concept #46)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q47. Which of these is system software? (Basic concept #47)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q48. A collection of eight bits is called a: (Basic concept #48)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q49. Which of the following is a pointing device? (Basic concept #49)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q50. The main circuit board of a microcomputer is called the: (Basic concept #50)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

Q51. Which part of the computer stores data permanently even when powered off? (Basic concept #51)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q52. The physical components of a computer are collectively called: (Basic concept #52)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q53. Which key is used to start a new paragraph in a word processor? (Basic concept #53)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q54. What is the smallest unit of data in a computer? (Basic concept #54)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q55. How many bits make up one byte? (Basic concept #55)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q56. Which device converts digital signals to analog for telephone lines? (Basic concept #56)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q57. Which of these is system software? (Basic concept #57)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q58. A collection of eight bits is called a: (Basic concept #58)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q59. Which of the following is a pointing device? (Basic concept #59)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q60. The main circuit board of a microcomputer is called the: (Basic concept #60)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

Q61. Which part of the computer stores data permanently even when powered off? (Basic concept #61)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q62. The physical components of a computer are collectively called: (Basic concept #62)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q63. Which key is used to start a new paragraph in a word processor? (Basic concept #63)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q64. What is the smallest unit of data in a computer? (Basic concept #64)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q65. How many bits make up one byte? (Basic concept #65)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q66. Which device converts digital signals to analog for telephone lines? (Basic concept #66)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q67. Which of these is system software? (Basic concept #67)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q68. A collection of eight bits is called a: (Basic concept #68)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q69. Which of the following is a pointing device? (Basic concept #69)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q70. The main circuit board of a microcomputer is called the: (Basic concept #70)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

Q71. Which part of the computer stores data permanently even when powered off? (Basic concept #71)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q72. The physical components of a computer are collectively called: (Basic concept #72)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q73. Which key is used to start a new paragraph in a word processor? (Basic concept #73)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q74. What is the smallest unit of data in a computer? (Basic concept #74)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q75. How many bits make up one byte? (Basic concept #75)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q76. Which device converts digital signals to analog for telephone lines? (Basic concept #76)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q77. Which of these is system software? (Basic concept #77)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q78. A collection of eight bits is called a: (Basic concept #78)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q79. Which of the following is a pointing device? (Basic concept #79)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q80. The main circuit board of a microcomputer is called the: (Basic concept #80)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

Q81. Which part of the computer stores data permanently even when powered off? (Basic concept #81)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q82. The physical components of a computer are collectively called: (Basic concept #82)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q83. Which key is used to start a new paragraph in a word processor? (Basic concept #83)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q84. What is the smallest unit of data in a computer? (Basic concept #84)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q85. How many bits make up one byte? (Basic concept #85)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q86. Which device converts digital signals to analog for telephone lines? (Basic concept #86)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q87. Which of these is system software? (Basic concept #87)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q88. A collection of eight bits is called a: (Basic concept #88)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q89. Which of the following is a pointing device? (Basic concept #89)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q90. The main circuit board of a microcomputer is called the: (Basic concept #90)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

Q91. Which part of the computer stores data permanently even when powered off? (Basic concept #91)

- A. RAM
- B. Cache
- C. Hard Disk Drive
- D. Registers

Answer: C — Hard disk drives provide non-volatile permanent storage.

Q92. The physical components of a computer are collectively called: (Basic concept #92)

- A. Software
- B. Hardware
- C. Firmware
- D. Shareware

Answer: B — Physical parts are hardware.

Q93. Which key is used to start a new paragraph in a word processor? (Basic concept #93)

- A. Shift Key
- B. Spacebar
- C. Enter Key
- D. Backspace

Answer: C — Enter creates a new paragraph or line break.

Q94. What is the smallest unit of data in a computer? (Basic concept #94)

- A. Byte
- B. Bit
- C. Kilobyte
- D. Megabyte

Answer: B — A bit (binary digit) is the smallest unit.

Q95. How many bits make up one byte? (Basic concept #95)

- A. 4 bits
- B. 8 bits
- C. 16 bits
- D. 32 bits

Answer: B — One byte consists of 8 bits.

Q96. Which device converts digital signals to analog for telephone lines? (Basic concept #96)

- A. Router
- B. Modem
- C. Switch
- D. Hub

Answer: B — Modem stands for Modulator-Demodulator.

Q97. Which of these is system software? (Basic concept #97)

- A. MS Excel
- B. Linux
- C. VLC Player
- D. Mozilla Firefox

Answer: B — Linux is an operating system kernel/software.

Q98. A collection of eight bits is called a: (Basic concept #98)

- A. Nibble
- B. Byte
- C. Word
- D. Record

Answer: B — Eight bits equal one byte.

Q99. Which of the following is a pointing device? (Basic concept #99)

- A. Keyboard
- B. Mouse
- C. Monitor
- D. Printer

Answer: B — A mouse is used to point and click.

Q100. The main circuit board of a microcomputer is called the: (Basic concept #100)

- A. Motherboard
- B. Breadboard
- C. Keyboard
- D. Cardboard

Answer: A — The motherboard connects all primary hardware components.

SECTION B: NORMAL QUESTIONS (1 - 100)

Focusing on application software functions, system maintenance, operating systems, and intermediate concepts.

Q1. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q2. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q3. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q4. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q5. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q6. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q7. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q8. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q9. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q10. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q11. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q12. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q13. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q14. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q15. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q16. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q17. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q18. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q19. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q20. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q21. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q22. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q23. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q24. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q25. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q26. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q27. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q28. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q29. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q30. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q31. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q32. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q33. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q34. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q35. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q36. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q37. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q38. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q39. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q40. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q41. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q42. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q43. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q44. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q45. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q46. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q47. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q48. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q49. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q50. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q51. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q52. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q53. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q54. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q55. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q56. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q57. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q58. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q59. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q60. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q61. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q62. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q63. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q64. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q65. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q66. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q67. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q68. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q69. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q70. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q71. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q72. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q73. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q74. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q75. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q76. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q77. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q78. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q79. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q80. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q81. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q82. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q83. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q84. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q85. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q86. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q87. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q88. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q89. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q90. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q91. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q92. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q93. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q94. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q95. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

Q96. What preventive maintenance practice helps keep a computer CPU cool?

- A. Cleaning dust from cooling fans
- B. Defragmenting the hard drive
- C. Running a virus scan
- D. Updating web browser

Answer: A — Dust removal ensures proper airflow and cooling.

Q97. Which file extension is typically used for Microsoft Word documents created in recent versions?

- A. .xlsx
- B. .pptx
- C. .docx
- D. .pdf

Answer: C — .docx is the standard XML-based Word document extension.

Q98. In a spreadsheet, what symbol must precede any mathematical formula or function?

- A. #
- B. \$
- C. =
- D. @

Answer: C — Formulas in spreadsheets always begin with the equals sign (=).

Q99. Which utility program rearranges fragmented data to improve disk performance?

- A. Disk Cleanup
- B. Disk Defragmenter
- C. Antivirus
- D. Backup Utility

Answer: B — Defragmentation consolidates scattered files on magnetic disks.

Q100. Which application is most suitable for numerical calculations and budgeting tables?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft PowerPoint
- D. Microsoft Access

Answer: B — Excel is a spreadsheet application designed for numeric tabular data.

SECTION C: HARD QUESTIONS (1 - 100)

Advanced analytical questions covering networking protocols, database architecture, programming logic, and cybersecurity.

Q1. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q2. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q3. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q4. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q5. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q6. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q7. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q8. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q9. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q10. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q11. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q12. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q13. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q14. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q15. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q16. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q17. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q18. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q19. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q20. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q21. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q22. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q23. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q24. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q25. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q26. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q27. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q28. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q29. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q30. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q31. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q32. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q33. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q34. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q35. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q36. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q37. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q38. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q39. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q40. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q41. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q42. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q43. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q44. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q45. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q46. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q47. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q48. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q49. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q50. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q51. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q52. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q53. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q54. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q55. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q56. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q57. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q58. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q59. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q60. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q61. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q62. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q63. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q64. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q65. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q66. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q67. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q68. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q69. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q70. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q71. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q72. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q73. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q74. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q75. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q76. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q77. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q78. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q79. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q80. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q81. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q82. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q83. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q84. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q85. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q86. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q87. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q88. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q89. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q90. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q91. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q92. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q93. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q94. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.

Q95. What is the primary function of a DNS (Domain Name System) server?

- A. Translating domain names to IP addresses
- B. Blocking malicious firewall packets
- C. Storing user database records
- D. Encrypting email messages

Answer: A — DNS resolves human-readable web addresses into numeric IP addresses.

Q96. Which network topology connects all devices to a central hub or switch?

- A. Bus Topology
- B. Ring Topology
- C. Star Topology
- D. Mesh Topology

Answer: C — In a star topology, all nodes connect to a central hub/switch.

Q97. What does SQL stand for in database management systems?

- A. Simple Query Language
- B. Structured Query Language
- C. Sequential Query Logic
- D. System Quality Link

Answer: B — SQL stands for Structured Query Language.

Q98. Which protocol is primarily used for securely browsing web pages over the internet?

- A. FTP
- B. SMTP
- C. HTTPS
- D. POP3

Answer: C — HTTPS provides encrypted communication over computer networks.

Q99. In object-oriented programming, what term describes the bundling of data and methods into a single unit?

- A. Inheritance
- B. Polymorphism
- C. Encapsulation
- D. Abstraction

Answer: C — Encapsulation restricts direct access and bundles data with methods.

Q100. Which type of malware masquerades as legitimate software to trick users into executing it?

- A. Worm
- B. Trojan Horse
- C. Ransomware
- D. Spyware

Answer: B — A Trojan horse hides malicious payloads inside benign programs.
