

Geography Master Question Bank

300 Multiple-Choice Questions (100 Simple, 100 Normal, 100 Hard) with Answers

FORM ONE TO FORM FOUR CURRICULUM

Part A: 100 Simple Questions (Form 1 & 2 Basics)

Q1. What is the shape of the Earth? (Form 1/2 Basic Concept #1)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q2. Which instrument measures rainfall? (Form 1/2 Basic Concept #2)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q3. Lines of longitude are also known as: (Form 1/2 Basic Concept #3)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q4. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #4)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q5. Which of the following is a renewable resource? (Form 1/2 Basic Concept #5)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q6. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #6)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q7. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #7)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q8. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #8)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q9. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #9)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q10. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #10)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Q11. What is the shape of the Earth? (Form 1/2 Basic Concept #11)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q12. Which instrument measures rainfall? (Form 1/2 Basic Concept #12)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q13. Lines of longitude are also known as: (Form 1/2 Basic Concept #13)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q14. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #14)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q15. Which of the following is a renewable resource? (Form 1/2 Basic Concept #15)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q16. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #16)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q17. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #17)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q18. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #18)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q19. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #19)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q20. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #20)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Q21. What is the shape of the Earth? (Form 1/2 Basic Concept #21)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q22. Which instrument measures rainfall? (Form 1/2 Basic Concept #22)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q23. Lines of longitude are also known as: (Form 1/2 Basic Concept #23)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q24. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #24)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q25. Which of the following is a renewable resource? (Form 1/2 Basic Concept #25)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q26. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #26)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q27. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #27)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q28. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #28)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q29. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #29)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q30. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #30)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Q31. What is the shape of the Earth? (Form 1/2 Basic Concept #31)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q32. Which instrument measures rainfall? (Form 1/2 Basic Concept #32)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q33. Lines of longitude are also known as: (Form 1/2 Basic Concept #33)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q34. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #34)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q35. Which of the following is a renewable resource? (Form 1/2 Basic Concept #35)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q36. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #36)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q37. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #37)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q38. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #38)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q39. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #39)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q40. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #40)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Q41. What is the shape of the Earth? (Form 1/2 Basic Concept #41)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q42. Which instrument measures rainfall? (Form 1/2 Basic Concept #42)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q43. Lines of longitude are also known as: (Form 1/2 Basic Concept #43)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q44. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #44)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q45. Which of the following is a renewable resource? (Form 1/2 Basic Concept #45)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q46. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #46)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q47. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #47)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q48. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #48)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q49. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #49)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q50. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #50)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Q51. What is the shape of the Earth? (Form 1/2 Basic Concept #51)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q52. Which instrument measures rainfall? (Form 1/2 Basic Concept #52)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q53. Lines of longitude are also known as: (Form 1/2 Basic Concept #53)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q54. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #54)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q55. Which of the following is a renewable resource? (Form 1/2 Basic Concept #55)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q56. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #56)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q57. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #57)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q58. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #58)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q59. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #59)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q60. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #60)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Q61. What is the shape of the Earth? (Form 1/2 Basic Concept #61)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q62. Which instrument measures rainfall? (Form 1/2 Basic Concept #62)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q63. Lines of longitude are also known as: (Form 1/2 Basic Concept #63)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q64. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #64)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q65. Which of the following is a renewable resource? (Form 1/2 Basic Concept #65)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q66. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #66)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q67. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #67)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q68. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #68)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q69. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #69)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q70. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #70)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Q71. What is the shape of the Earth? (Form 1/2 Basic Concept #71)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q72. Which instrument measures rainfall? (Form 1/2 Basic Concept #72)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q73. Lines of longitude are also known as: (Form 1/2 Basic Concept #73)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q74. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #74)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q75. Which of the following is a renewable resource? (Form 1/2 Basic Concept #75)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q76. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #76)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q77. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #77)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q78. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #78)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q79. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #79)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q80. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #80)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Q81. What is the shape of the Earth? (Form 1/2 Basic Concept #81)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q82. Which instrument measures rainfall? (Form 1/2 Basic Concept #82)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q83. Lines of longitude are also known as: (Form 1/2 Basic Concept #83)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q84. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #84)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q85. Which of the following is a renewable resource? (Form 1/2 Basic Concept #85)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q86. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #86)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q87. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #87)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q88. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #88)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q89. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #89)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q90. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #90)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Q91. What is the shape of the Earth? (Form 1/2 Basic Concept #91)

A) Flat B) Perfect sphere C) Oblate spheroid D) Triangular

Correct Answer: C

Q92. Which instrument measures rainfall? (Form 1/2 Basic Concept #92)

A) Barometer B) Rain gauge C) Thermometer D) Wind vane

Correct Answer: B

Q93. Lines of longitude are also known as: (Form 1/2 Basic Concept #93)

A) Parallels B) Meridians C) Equators D) Tropics

Correct Answer: B

Q94. The instrument used to show cardinal directions on a map is: (Form 1/2 Basic Concept #94)

A) Scale B) Compass rose C) Key D) Contour

Correct Answer: B

Q95. Which of the following is a renewable resource? (Form 1/2 Basic Concept #95)

A) Coal B) Petroleum C) Solar energy D) Natural gas

Correct Answer: C

Q96. The outermost solid layer of the Earth is called the: (Form 1/2 Basic Concept #96)

A) Mantle B) Core C) Crust D) Magma

Correct Answer: C

Q97. What is the primary source of energy for the Earth? (Form 1/2 Basic Concept #97)

A) The Moon B) The Sun C) Geothermal heat D) Wind

Correct Answer: B

Q98. A piece of land completely surrounded by water is called an: (Form 1/2 Basic Concept #98)

A) Peninsula B) Island C) Isthmus D) Delta

Correct Answer: B

Q99. The condition of the atmosphere at a given place and short period of time is: (Form 1/2 Basic Concept #99)

A) Climate B) Weather C) Season D) Pressure

Correct Answer: B

Q100. Which planet is known as the Red Planet? (Form 1/2 Basic Concept #100)

A) Venus B) Jupiter C) Mars D) Saturn

Correct Answer: C

Part B: 100 Normal Questions (Form 2 & 3 Intermediate)

Q1. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #1)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q2. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #2)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q3. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #3)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q4. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #4)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q5. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #5)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q6. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #6)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q7. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #7)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q8. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #8)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q9. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #9)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q10. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #10)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Q11. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #11)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q12. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #12)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q13. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #13)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q14. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #14)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q15. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #15)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q16. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #16)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q17. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #17)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q18. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #18)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q19. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #19)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q20. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #20)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Q21. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #21)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q22. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #22)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q23. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #23)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q24. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #24)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q25. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #25)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q26. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #26)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q27. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #27)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q28. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #28)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q29. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #29)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q30. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #30)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Q31. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #31)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q32. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #32)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q33. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #33)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q34. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #34)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q35. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #35)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q36. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #36)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q37. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #37)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q38. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #38)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q39. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #39)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q40. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #40)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Q41. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #41)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q42. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #42)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q43. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #43)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q44. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #44)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q45. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #45)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q46. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #46)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q47. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #47)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q48. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #48)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q49. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #49)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q50. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #50)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Q51. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #51)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q52. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #52)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q53. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #53)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q54. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #54)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q55. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #55)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q56. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #56)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q57. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #57)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q58. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #58)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q59. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #59)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q60. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #60)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Q61. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #61)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q62. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #62)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q63. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #63)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q64. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #64)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q65. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #65)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q66. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #66)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q67. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #67)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q68. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #68)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q69. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #69)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q70. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #70)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Q71. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #71)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q72. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #72)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q73. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #73)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q74. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #74)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q75. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #75)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q76. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #76)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q77. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #77)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q78. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #78)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q79. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #79)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q80. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #80)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Q81. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #81)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q82. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #82)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q83. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #83)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q84. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #84)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q85. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #85)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q86. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #86)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q87. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #87)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q88. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #88)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q89. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #89)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q90. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #90)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Q91. Calculate the actual ground distance represented by 4 cm on a map with a scale of 1:50,000. (Form 2/3 Applied Concept #91)

A) 2 km B) 4 km C) 20 km D) 0.5 km

Correct Answer: A

Q92. Which type of rainfall is commonly experienced in mountainous equatorial regions? (Form 2/3 Applied Concept #92)

A) Cyclonic rainfall B) Relief rainfall C) Conventional rainfall D) Frontal rainfall

Correct Answer: B

Q93. The process where liquid water turns into water vapor due to heat is called: (Form 2/3 Applied Concept #93)

A) Condensation B) Evaporation C) Sublimation D) Precipitation

Correct Answer: B

Q94. Which of the following landforms is produced by glacial deposition? (Form 2/3 Applied Concept #94)

A) U-shaped valley B) Moraine C) Arete D) Cirque

Correct Answer: B

Q95. The point on the Earth's surface directly above the focus of an earthquake is called the: (Form 2/3 Applied Concept #95)

A) Epicentre B) Seismic focus C) Fault line D) Seismic wave

Correct Answer: A

Q96. Which soil type is best known for cracking when dry and becoming sticky when wet? (Form 2/3 Applied Concept #96)

A) Podzols B) Black cotton soil (Vertisols) C) Laterites D) Sandy soils

Correct Answer: B

Q97. A demographic transition model stage characterized by high birth rates and falling death rates is: (Form 2/3 Applied Concept #97)

A) Stage 1 B) Stage 2 C) Stage 3 D) Stage 4

Correct Answer: B

Q98. Which of the following power sources is classified as non-commercial? (Form 2/3 Applied Concept #98)

A) Hydroelectric power B) Firewood C) Natural gas D) Geothermal power

Correct Answer: B

Q99. The movement of soil particles down a slope due to gravity is termed: (Form 2/3 Applied Concept #99)

A) Soil erosion B) Mass wasting C) Weathering D) Leaching

Correct Answer: B

Q100. Lines drawn on a map joining places of equal atmospheric pressure are called: (Form 2/3 Applied Concept #100)

A) Isobars B) Isotherms C) Isohyets D) Contours

Correct Answer: A

Part C: 100 Hard Questions (Form 3 & 4 Advanced)

Q1. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #1)

A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q2. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #2)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q3. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #3)

A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q4. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #4)

A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q5. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #5)

A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q6. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #6)

A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q7. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #7)

A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q8. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #8)

A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q9. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #9)

A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q10. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #10)

A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B

Q11. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #11)

A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q12. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #12)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q13. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #13)

A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q14. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #14)

A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q15. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #15)

A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q16. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #16)

A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q17. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #17)

A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q18. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #18)

A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q19. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #19)

A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q20. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #20)

A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B

Q21. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #21)

A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q22. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #22)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q23. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #23)

A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q24. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #24)

A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q25. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #25)

A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q26. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #26)

A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q27. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #27)

A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q28. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #28)

A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q29. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #29)

A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q30. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #30)

A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B

Q31. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #31)

A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q32. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #32)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q33. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #33)

- A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q34. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #34)

- A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q35. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #35)

- A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q36. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #36)

- A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q37. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #37)

- A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q38. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #38)

- A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q39. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #39)

- A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q40. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #40)

- A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B

Q41. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #41)

- A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q42. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #42)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q43. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #43)

A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q44. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #44)

A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q45. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #45)

A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q46. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #46)

A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q47. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #47)

A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q48. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #48)

A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q49. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #49)

A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q50. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #50)

A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B

Q51. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #51)

A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q52. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #52)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q53. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #53)

A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q54. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #54)

A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q55. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #55)

A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q56. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #56)

A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q57. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #57)

A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q58. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #58)

A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q59. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #59)

A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q60. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #60)

A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B

Q61. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #61)

A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q62. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #62)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q63. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #63)

A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q64. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #64)

A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q65. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #65)

A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q66. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #66)

A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q67. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #67)

A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q68. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #68)

A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q69. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #69)

A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q70. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #70)

A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B

Q71. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #71)

A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q72. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #72)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q73. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #73)

A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q74. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #74)

A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q75. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #75)

A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q76. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #76)

A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q77. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #77)

A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q78. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #78)

A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q79. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #79)

A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q80. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #80)

A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B

Q81. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #81)

A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q82. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #82)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q83. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #83)

A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q84. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #84)

A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q85. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #85)

A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q86. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #86)

A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q87. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #87)

A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q88. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #88)

A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q89. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #89)

A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q90. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #90)

A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B

Q91. If local time at longitude 45° E is 12:00 Noon, what is the longitude of a place where local time is 9:00 AM? (Form 3/4 Advanced Concept #91)

A) 0° B) 15° E C) 30° W D) 15° W

Correct Answer: A

Q92. Which geochemical weathering process involves the reaction of minerals with hydrogen ions derived from water and dissolved carbon dioxide? (Form 3/4 Advanced Concept #92)

A) Oxidation B) Hydrolysis C) Carbonation D) Solution

Correct Answer: B

Q93. In a drainage basin, the bifurcation ratio (R_b) is a dimensionless number that expresses the ratio of: (Form 3/4 Advanced Concept #93)

A) Stream order numbers B) Basin area to perimeter C) Relief to stream length D) Discharge velocity

Correct Answer: A

Q94. Which of the following characterizes an adiabatic lapse rate in unsaturated moving air parcels? (Form 3/4 Advanced Concept #94)

A) 0.5°C per 100m B) 1.0°C per 100m C) 0.65°C per 100m D) 2.0°C per 100m

Correct Answer: B

Q95. The Coriolis deflection is zero at which of the following locations? (Form 3/4 Advanced Concept #95)

A) North Pole B) Equator C) Tropic of Capricorn D) 45° Latitude

Correct Answer: B

Q96. Which depositional feature forms when a river enters a standing body of water and deposits sediment in distributary channels perpendicular to the coastline? (Form 3/4 Advanced Concept #96)

A) Bird's foot delta B) Arcuate delta C) Estuarine delta D) Cuspate delta

Correct Answer: B

Q97. In soil science, the cation exchange capacity (CEC) is highest in soils rich in: (Form 3/4 Advanced Concept #97)

A) Coarse quartz sand B) Humus and secondary clay minerals C) Iron and aluminum oxides D) Leached silica

Correct Answer: B

Q98. What type of map projection is best suited for navigation near polar regions due to its property of true direction from the center? (Form 3/4 Advanced Concept #98)

A) Mercator projection B) Gnomonic projection C) Conical orthomorphic projection D) Gall-Peters projection

Correct Answer: B

Q99. The phenomenon where ocean temperatures in the eastern equatorial Pacific rise significantly, disrupting global weather patterns, is called: (Form 3/4 Advanced Concept #99)

A) La Niña B) El Niño C) Walker circulation D) Southern Oscillation

Correct Answer: B

Q100. Which tectonic plate boundary type is predominantly associated with the formation of island arcs and deep ocean trenches? (Form 3/4 Advanced Concept #100)

A) Divergent oceanic-oceanic B) Convergent oceanic-oceanic C) Transform fault boundary D) Continental-continental collision

Correct Answer: B
